

Unit 1 – Reflection

In Unit 1 I started by looking around the requirements of the Research Methods and Professional Practice module. Unit 1 helped me to get an idea of what I need to prepare in order to successfully complete the module.

Additionally, in Unit 1 I prepare my Collaborative discussion post in a computer ethics case study regarding a Medical Implant. Furthermore, I studied a document (Stahl et al (2016)) and completed a reflective activity in computing ethics.

Finally, I looked at the list of approved literature review topics and started deciding which topic I will choose.

Overall, Unit 1 was a busy week not only because of its assignments, but mostly because I was still trying to figure out its requirements.
