

## **Unit 8 – Reflection**

In Unit 8 we worked in the third collaborative discussion where each student selected a pre-GDPR case regarding controversial personal data processing. I selected a case regarding the processing of personal data recorded with a CCTV system. Furthermore, I read about the PCI-DSS regulation for processing online payments and the HIPPA regulation regarding the processing of medical data. Overall, it was a very interesting week as studying the applicable regulations computing professionals can become more aware of lawful ethics.

### **Team Meetings Notes:**

- We discussed the EU GDPR requirements and shared our GDPR thoughts.
- We prepared our GDPR/PCI-DSS presentation.
- We started giving tips about the preparation of our e-portfolios.
