

Unit 4 – Reflection

During Unit 4 I continued my studies by reading about the data collection methods (surveys, interviews, etc.). I also tried to decide which method would be most suitable for my literature review, however, I decided a data collection would not be necessary.

Furthermore, I prepared a case study in data privacy for our seminar regarding a computer clerk with access to customer data and whether he should disclose them for a survey.

Unit 4 was the last relaxed week before starting researching for my literature review assignment. Overall, it was a pleasant week.
