

## **Unit 9 – Reflection**

In Unit 9 I started reading about the system logging, the types of logs and its analysis tools. I also started gathering all the information for the Unit 11 submission. Furthermore, I prepared a summary of the collaborative discussion three.

### **Team Meetings Notes:**

- We performed some scans using Shhgit and SkyArt open-source tools.
- We discussed the logging systems and shared our experience about it.
- We continued working towards our final assignment.
