

Knowledge and Understanding

Information/Content

You put a lot of work into your slides. However, more efforts are required to formulate a clear problem and objectives.

Presentation and Communication Skills

Purpose communicated clearly and you appeared to be well-prepared. There is a lack of visual aids.

Criticality:

Analysis and Interpretation

The research problem mentioned the limitations of DL but you did not provide a research problem. A research problem is a statement about an area of concern, a condition to be improved, a difficulty to be eliminated, or a troubling question that exists in scholarly literature. Your research problem needs reformulation.

You presented a clear research plan in your presentation and the script. However, the research methodology/ research design could be in more detail, having that the research methodology is the general approach the researcher takes in carrying out the research project.

The provided objective is general, I expected to see a more specific objective. Clear attempts to go beyond the ideas presented in the secondary literature

Structure and Presentation (as detailed in assessment guidance)

Organisation of presentation and

Time management

The presentation is well structured and organized and easy to follow. The proposal was presented excellently. Time for presentation used effectively.

From such a research project, we could have artefacts from the modeling phase and also as results.

Overall, the presentation satisfied the requirement.

Use of Relevant Sources

Some key points are supported with highly relevant and accurate evidence.
