

## **Unit 10 – Reflection**

In Unit 10 I read about security breaches and how to mitigate them. Additionally, we were asked to select one data breach and attempt to answer some questions. I selected the 2011 attack against SONY PlayStation Network because I was one of the affected users. I vividly remember how inconvenient it was for all parties and how hard SONY tried to recover from it.

### **Team Meetings Notes:**

- We made a list of all the required tasks for the final assignment, and we shared the responsibilities between all four members.
- We started working on the final assignment in order to complete it on time.
- We continued giving tips for our e-portfolios.
