Unit 2 – Reflection

During Unit 2 of my Software Engineering Project Management module, I completed and posted my first collaboration discussion post.

I also read how to use the Gherkin language to create a set of requirements readable by technical and non-technical.

In order to complete my Gherkin language fresh knowledge, I prepared myself for the first seminar with our tutor by completing a Gherkin sequence that consisted of three scenarios for using a new coffee making machine.

Unfortunately, due to other commitments, I was not able to attend the seminar. However, I did manage to meet with my tutor through a video call he organised to meet with everybody from my team.
