Unit 11 – Reflection

During Unit 11, I felt relieved of having successfully completed my research presentation and I was glad to be reading additional learning theories.

In unit 11 I was mostly preparing my skill matrix excel document, where I listed all the skills gained from the Research Methods and Professional Practice module, their level of expertise and some evidence.

Additionally, I started updating my HTML5 code locally for my e-portfolio assignment.

Overall, Unit 11 made it clear and nostalgic that another module was reaching its completion. However, I was happy as I was designing my e-Portfolio RMPP section.
